## What is a Pediatric Hospitalist?

While in the hospital, your child may receive care from a Pediatric Hospitalist.

- Pediatric Hospitalists are doctors who are trained to care for children in the hospital.
- They spend their whole day in the hospital caring for patients.
- They teach the residents and medical students — who care for your child 24 hours a day.

## **Your Child's Hospitalist:**

- Asks you questions about your child.
- Discusses your child's condition, and answers your questions.
- Works with your child's doctor while your child is in the hospital.
- Plans after-hospital care with you and your child's doctor.
- Knows you are an important part of the health care team.
